NEW FRONTIERS

CALL FOR PAPERS

APPEA is delighted to announce arrangements for the preparation and submission of papers for the largest annual oil and gas event in the southern hemisphere.

Opportunities are now open for current and topical material to be presented at this world-class event with papers being sought from both geoscientific and other technical and commercial areas.

APPEA is pleased to offer both peer reviewed papers and extended abstract papers (maximum 1000 words and accompanying figures) for presentation at the conference and submission into the internationally acclaimed APPEA Journal (with conference proceedings in a DVD format).

TOPICS OF INTEREST

Highly sought after topics include (but are not limited to):

- LNG
- Gas supply and demand
- International innovations
- Deep sea engineering and technologies
- Where's the oil?
- Enabling technology for exploration and production
- Well and production technologies
- Geological concepts and integrated modelling
- Targeting Australian petroleum
- Northern Australia exploration and production
- Geophysical technology for exploration and production
- Coal seam methane
- Appraisal: getting it right
- Engineering innovation
- Oil and gas developments
- Greenhouse and climate change
- Australia in the world of petroleum
- Skills, education and training
- Indigenous employment initiatives
- Safety, security and environmental performance
- Corporate and global environment
- Legal and accounting developments
- Economics and taxation
- Industry and the community

Submissions referring to case studies will be highly regarded by the Technical Papers Committee. Please note proposals that are deemed to represent commercial advertising material will not be considered.
