WANT A CLEANER FUTURE?

US TOO. NATURAL GAS CAN HELP US GET THERE.

Cleaner energy for our homes

Natural gas provides almost half of Australia's household energy but produces just 13% of household emissions.

Cleaner skies in our region

Natural gas is replacing coal, woodfires and dung in Asia.

Perfect partner for renewables

Natural gas is working alongside renewables around Australia for cleaner energy.

Real technology today

The natural gas industry has high-tech emissions reduction and removal projects all over Australia.

We're not just ready for a cleaner future, we're already helping Australia get there.

Energy for a Better Australia
